I PART. Reading Comprehension

A. Read the text carefully. Then complete the reading with the linking words below. Drag the options and drop them in the corresponding space. (4 points)

Ecommerce website design

Different types of website design call for different elements. When building an ecommerce website, you'll need a shopping cart component that allows users to add and remove products and also lets you set pricing, offer deals, and establish discounts. You need a payment gateway | so | ✔ users can complete their transactions.

As you approach your ecommerce website design, it's important to think about how your visitors will interact with your site. Chances are, you'll want to offer discounts | and | ✔ promotions in the future, so build that functionality into your site from the beginning.

Make it easy for potential customers to find what they want in the least amount of clicks. You can keep the shopping experience streamlined by breaking the products in your ecommerce store into categories that visitors can filter by. Including a robust search functionality is a nice touch, too.

Don't forget about product photos. Many different kinds of websites rely on great photography, | but | ✔ for ecommerce websites your photos can make | or | ✔ break your sales. Use high-quality images to ensure trust in your brand and showcase your current deals on the homepage as high up as you can.

IV PART. Production

Provide 3 recommendations for good computer use and workstation health. Follow the example. (2 points each: 1 pt. grammar, 1 pt. content)

<u>Example</u>: Make sure there is enough light in the room.

1. Adjust your chair and monitor for good posture.

2. Position your monitor at eye level to reduce strain on your neck and eyes.

3.Keep your computer and its components clean from dust and debris to maintain optimal performance.

Different answers may be accepted.

Examples:

- Adjust the computer monitor either at eye level or slightly lower.
- Use an ergonomic chair.
- Your feet should rest flat on the floor.
